

Island Survival

- Imagine that your cruise ship just sank in the Caribbean, and you awaken to find yourselves on a tropical desert island. Gilligan and Ginger are nowhere in sight—the two of you are the only survivors. One of you is injured. You have no idea where you are. You think there's some chance that people know of the ship's distress, but you are not sure. A storm appears to be on the way. You decide that you need to prepare to survive on this island for some time. You also hope to find a way to make your self visible so that you can be spotted by a rescue party. There is a bunch of stuff from the ship on the beach that could help you, but you can only carry ten items.

Your Stranded . . .

- Step 1: Using the Chart provided, decide the TEN items that you are going to take with you to help you survive. Then rank them in order from 1-10 with 1 being the most important item!

Your Mission . . .

- Step 2: Find a partner (preferably of the opposite sex) and compare your lists. Together come up with a consensus list of ten items.
 - That means talking it over and working as a **team** to solve the problem together.
 - **Both** of you need to be influential in discussing the problem and in making the final decisions.

Your Mission . . .
