

# ADULT ROLES MARRIAGE COST ASSIGNMENT - BOYS

in your assignment\*

NAME \_\_\_\_\_

PERIOD \_\_\_\_\_

You have the chance to plan your own wedding! Your assignment will be to estimate how much it will cost for the engagement, marriage, reception, honeymoon, etc. You need to be as realistic as possible with money you will have to spend. Ask your parents how much money they will give you and then think of the money you have and the money that your future in-laws might supply. You will list today what you anticipate the cost to be and at the end of the assignment you will list the actual price. You will then compare dreams with realities. Work within a budget as you plan and prepare this assignment. It will be helpful. Be descriptive and careful as you make choices for your wedding. Take time and make this assignment neat so that you can use it in the future. Include pictures and printouts from actual business as you visit them. You may also include pictures out of magazines, or from the internet. Make sure you identify the place you are getting the item from and the cost. You need to put your assignment in a nice folder.

For each item you must have the following information (place the information by the picture):

- a picture
- the place you are getting the item from
- the price

At the end of your project write a summary page that should include all of the following:

- what I learned from this assignment
- was your estimate close to your actual costs
- my feelings about money
- paying for weddings
- amount of time spent on after marriage planning
- are weddings worth the money spent

A second page should include a cost break down for each of the 17 sections and a grand total cost of your planned wedding. *(do not include the price of the grooms ring in the grand total of your wedding)*

**ASSIGNMENT DUE:**

\_\_\_\_\_
